

Type EZR regulators are easily adaptable to Fisher's RegFlo™ pressure and flow instruments.

Type EZR's patented travel indicator makes maintenance easier.

Engineering the flow.

Type EZR's patented metal plug provides tight shutoff.

Type EZR has a patented diaphragm designed to withstand more wear and tear, and generally prolong the life of the regulator.

The revolutionary flow path of the Type EZR not only minimizes the damage from debris, but also provides enhanced noise reduction. A smooth flow geometry and enlarged flow recovery area, as compared to present boot-style regulators, give Fisher the ability to build a regulator that operates more quietly than ever before.

The stainless steel inlet screen prevents large particles from entering the regulator.

Type EZR Pressure Regulator for the gas utility industry

New – Type EZR OSX slam-shut valve may be pre-set to totally and rapidly cut off gas flow relative to over- or under-pressure conditions of the pipeline.

Type EZR Pressure Regulator With Advanced Flow Technology

- Tight shutoff
- Long life
- Quiet operation
- Easy maintenance
- In stock, immediately available
- Sizes: 1, 2, 2 x 1, 3, 4, 6 x 4, 8 x 4, 6, 8 x 6, 12 x 6, 8-inch (DN 25, 50, 50 x 25, 80, 100, 150 x 100, 200 x 100, 150, 200 x 150, 300 x 150, 200)
- Relief pilot configurations also available
